SSN COLLEGE OF ENGINEERING, KALAVAKKAM
Department of Computer Science and Engineering
UCS1601---Internet Programming
Assignment – 6
Due Date: 3-4-2021 (8 PM)

1. Write a Ajax program to display branch details for a bank as a Single Page Application. Create a XML file to store all branch details for the bank with fields State, District, branch, address, IFSC, MICR, branch code. Create a table format in Ajax to display all branches of the bank. On click each branch, display all details about the particular branch (Ajax).
